USEFUL INFORMATIONS & EXPLANATIONS

VOLUME CHARGE:

The charge for each shipment depends on the combination of size and weight (volumetric system of the International Air Transport Association IATA). If the volumetric weight of the shipment is greater than the actual weight (cases of light but voluminous shipments), then the charge is based on the volumetric weight and is calculated by multiplying the shipment's three dimensions and then by dividing by 5.000.

$$\text{Volumetric Weight (in kg)} = \frac{(\text{length}) \times (\text{width}) \times (\text{height}) \text{ in cm}}{5.000}$$

TYPES OF CHARGES:

Both international and domestic dispatches can be claimed either from the sender or the recipient unless the latter refuses to accept the cost. In this case, the parcel is turned back to the sender at his/her cost. All mentioned prices are valid only for shipments at sender's charge.

The repayment of the costs of dispatches can be done either in cash or on credit, given that the customer has signed a special agreement.
